

LPE18:

The screenshot shows the Visual Studio Code editor with the file `LPE18.cpp` open. The code is as follows:

```
11 for (int i = 0; i < 2; i++) {
12     for (int j = 0; j < 2; j++) {
13         a = i;
14         b = j;
15
16         // implicacion logica
17         bool implicacion = (a || b);
18
19         cout << "a=" << a << " b=" << b << endl;
20
21         if (a || b)
22             cout << "(a || b) = verdadero\n";
23         else
24             cout << "(a || b) = falso\n";
25
26         cout << "Resultado de a -> b: " << implicacion << endl;
27         cout << "-----\n";
28     }
29 }
30
31 return 0;
32
33 }
```

The debugger window is open, showing the current state of variables:

Nombre	Valor	Tipo
a	false	bool
b	false	bool
i	0	int
implicacion	true	bool
j	0	int

The output window shows the following text:

```
Prueba de implicacion material
a -> b equivale a (a || b)

a=0 b=0
```
